Title...
long title new line

Subtitle

Author One[1,2]   Author Two[2]

[1]University of York
[2]Another Affiliation

This is an example of a very long title that needs to be split in two lines (no longer than 2 lines are visually comfortable)

You may need to add some space after the frame title

```
\setlength{\frametitlemargin}{10mm}
```

This is an example of a very long title that needs to be split in two lines (no longer than 2 lines are visually comfortable)

You may need to add some space after the frame title

```
\setlength{\frametitlemargin}{10mm}
```

Using an empty frametitle or not using it, you will need to add initial space by yourself. To have an "empty" frametitle you can use

```
\emptyframetitle
```

This is an example of a very long title that needs to be split in two lines (no longer than 2 lines are visually comfortable)

You may need to add some space after the frame title

```
\setlength{\frametitlemargin}{10mm}
```

Using an empty frametitle or not using it, you will need to add initial space by yourself. To have an "empty" frametitle you can use

```
\emptyframetitle
```

or (more portable)

```
\frametitle{\strut}
```

If you do not want any titles in a frame, you can use

`\noframetitle`

Using

\noframetitle[0mm]

As above, you may want to use the same command with a length to specify where (vertically) the text should begin.

Single title

If you need just a simple title you can use

`\framesingletitle{your title}`

You may want to use the same command with a length to specify where (vertically) the title should begin.

`\framesingletitle[0mm]{your title}`

Blocks

Additional blocks

- ▶ termblock
- ▶ problock
- ▶ conblock
- ▶ yellowblock
- ▶ blueblock

Transparency of blocks may not look very nice on dark backgrounds, to disable it:

```
\setblockbodyopacity{1}
```

block

▶ text

block[green] - all blocks support custom colours for item elements
